

# Red Hat System Administration I (RH124)

## Table of content

- **Get started with Red Hat Enterprise Linux**
  - Describe and define open source, Linux distributions, and Red Hat Enterprise Linux.
- **Access the command line**
  - Log into a Linux system and run simple commands using the shell.
- **Manage files from the command line**
  - Copy, move, create, delete, and organize files while working from the bash shell.
- **Get help in Red Hat Enterprise Linux**
  - Resolve problems by using local help systems.
- **Create, view, and edit text files**
  - Manage text files from command output or in a text editor.
- **Manage local users and groups**
  - Create, manage, and delete local users and groups, as well as administer local password policies.
- **Control access to files**
  - Set Linux file system permissions on files and interpret the security effects of different permission settings.
- **Monitor and manage Linux processes**
  - Evaluate and control processes running on a Red Hat Enterprise Linux system.
- **Control services and daemons**
  - Control and monitor network services and system daemons using systemd.
- **Configure and secure SSH**
  - Configure secure command line service on remote systems, using OpenSSH.
- **Analyze and store logs**
  - Locate and accurately interpret logs of system events for troubleshooting purposes.
- **Manage networking**
  - Configure network interfaces and settings on Red Hat Enterprise Linux servers.
- **Archive and transfer files**
  - Archive and copy files from one system to another.
- **Install and update software packages**
  - Download, install, update, and manage software packages from Red Hat and DNF package repositories.
- **Access Linux files systems**
  - Access, inspect, and use existing file systems on storage attached to a Linux server.
- **Analyze servers and get support**
  - Investigate and resolve issues in the web-based management interface, getting support from Red Hat to help solve problems.
